Perspectives of Neural-Symbolic Integration (Studies in Computational Intelligence)

When it comes to robotics and bioinformatics, the Holy Grail everyone is seeking is how to dovetail logic-based inference and statistical machine learning. This volume offers some possible solutions to this eternal problem. Edited with flair and sensitivity by Hammer and Hitzler, the book contains state-of-the-art contributions in neural-symbolic integration, covering 'loose' coupling by means of structure kernels or recursive models as well as 'strong' coupling of logic and neural networks.

Jane Abraham:

Information is provisions for individuals to get better life, information today can get by anyone on everywhere. The information can be a information or any news even a huge concern. What people must be consider when those information which is within the former life are difficult to be find than now could be taking seriously which one is acceptable to believe or which one the resource are convinced. If you find the unstable resource then you have it as your main information you will have huge disadvantage for you. All those possibilities will not happen throughout you if you take Perspectives of Neural-Symbolic Integration (Studies in Computational Intelligence) as the daily resource information.
