APES or ANGELS?: A Summary For many readers this book will be a mind-altering experience. It has a thesis that is a challenge to the conventional thinking of most Christians and their counterparts, the secular humanists. It offends both for very good reasons. It speaks the truth about Darwin's views on human origins and race. Contrary to the beliefs of most academicians and educated readers, Darwin had two dangerous ideas instead of one. Daniel Dennett was perfectly right about the first, which was the notion that natural selection operated in a way that precluded explanatory intrusions from outside the natural world. In other words, metaphysics has no place in biological explanation. Things spiritual, like vitalism and finalism, are simply inapplicable to evolutionary biology. The second idea is rarely mentioned in politically correct America- that the human races are different in sometimes significant ways. Indeed, inequality is a normal condition of nature. Darwin's clash with Christianity is winding down because modern science is a foundation of western culture and it fully accepts the truth of natural selection and the evolution of life(including man). It is ironic that as the struggle with Christianity declines, a new struggle emerges- the battle over racial differences. Liberalism evolved into radical egalitarianism as it swept over America, creating an authoritarian political correctness that contradicts our Constitution. Modern genetics now threatens the liberal myth of human equality. These Darwinian conflicts are playing out amidst our culture wars, a battle that could transform us into another Brazil. Radical egalitarianism and multiculturalism are ideologies aimed at dismantling our great Anglo-European tradition. Forces of erosion are at work which may make our nation's greatness a faint memory. The battle with creationism is essentially over in Europe and it is winding down in the U.S. Science always wins fights over the facts of nature
