## Architecture Against the Post-Political: Essays in Reclaiming the Critical Project

Written by a team of renowned contributors and carefully edited to address the themes laid out by the editors in their introduction, the book includes theoretical issues concerning the questions of aesthetics and politics and addresses city and urban strategies within the general critique of the "post-political". By focusing on specific case studies from Warsaw, Barcelona, Dubai, Tokyo and many more the book consolidates the contributions of a diverse group of academics, architects and critics from Europe, the Middle East and America.

This collection fills the gap in the existing literature on the relation between politics and aesthetics, and its implications for the theoretical discourse of architecture today. In summary, this book provides a response to the predominant de-politicization in academic discourse and is an attempt to re-claim the abandoned critical project in architecture.
