The result is a Research Handbook that is comprehensive in its coverage of jurisdictions, issues and debates. It is an indispensable starting point for researchers wishing to understand the field and its many topics.'

- Peter Drahos, Australian National University and Queen Mary University of London, UK

Research Handbook on Human Rights and Intellectual Property is a comprehensive reference work on the intersection of human rights and intellectual property law. Resulting from a field-specific expertise of over 40 scholars and professionals of world renown, the book explores the practical and doctrinal implications of human rights considerations on intellectual property law and jurisprudence.

The various chapters of the book scrutinize issues related to interactions among and between norms of different legal families and the role of human rights in the development of a balanced intellectual property legal framework. The innovative approach of the book is reflected in its structure: the first part provides a foundation for the human rights and intellectual property discourse; the second sheds light on the human rights implications for the development of intellectual property; and the third (characterized by a human rights perspective) is devoted to the specific issues of interaction between human rights and intellectual property.

Exploring in depth a variety of interactions between human rights and intellectual property law, the book will be of great interest to academics and experts working within human rights, intellectual property, development, international relations and international public law.
