## **Nursing Informatics for the Advanced Practice Nurse: Patient Safety, Quality, Outcomes, and Interprofessionalism** Susan McBride PhD RN-BC CPHIMS, Mari Tietze PhD RN-BC FHIMSS

Designed specifically for graduate-level nursing informatics courses, this text focuses on using technology with an interprofessional team to improve patient care and safety. It delivers an expansive and innovative approach to devising practical methods of optimizing technology to foster quality of patient care and support population health initiatives. Based on the requirements of the DNP Essential IV Core Competency for Informatics and aligning with federal policy health initiatives, including the Affordable Care Act, the book describes models of information technology the authors have successfully used in health information technology (HIT) to reinforce core competencies needed in multiple practice settings. Data management and analytics are emphasized in the text, supporting clinical improvement as well as business aspects of the health care system. The authors espouse a hybrid approach to teaching with a merged competency and concept-based curriculum.

With an emphasis on the benefits of an interprofessional team, the book describes the most effective approaches to health care delivery using health information technology. It describes a nursing informatics model that is comprised of three core domains: point-of-care technology, data management and analytics, and patient safety and quality. The final section of the text explores new and emerging technologies, including genomics, nanotechnology, artificial intelligence, data mining, expanded use of electronic measurements, and innovations in patient engagement in social media. Case studies and critical thinking exercises support the concept-based curriculum and facilitate out-of-the-box thinking. Supplemental materials for instructors include PowerPoint slides and a test bank. While targeted primarily for the nursing arena, the text is also of value in medicine, health information management, occupational therapy, and physical therapy.

### **KEY FEATURES:**

- Addresses the DNP Essential IV Core Competency for Informatics
- Focuses specifically on using nursing informatics expertise to improve population health, quality, and safety
- Advocates an interprofessional team approach to optimizing health IT in all practice settings
- Stimulates critical thinking skills that can be applied to all aspects of IT health care delivery
- Discusses the newest approaches to interprofessional education for IT health care delivery
- Includes PowerPoint slides, a comprehensive test bank, and an instructor's manual to help faculty with this challenging content, as well as a student study guide

**From reader reviews:**

**James Sanchez:**

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite reserve and reading a guide. Beside you can solve your short lived problem; you can add your knowledge by the reserve entitled *Nursing Informatics for the Advanced Practice Nurse: Patient Safety, Quality, Outcomes, and Interprofessionalism*. Try to make the book *Nursing Informatics for the Advanced Practice Nurse: Patient Safety, Quality, Outcomes, and Interprofessionalism* as your good friend. It means that it can to get your friend when you experience alone and beside those of course make you smarter than before. Yeah, it is very fortuned to suit your needs. The book makes you much more confidence because you can know every little thing by the book. So , let us make new experience and knowledge with this book.

**James Soltero:**

What do you think about book? It is just for students since they are still students or it for all people in the world, what best subject for that? Just simply you can be answered for that query above. Every person has several personality and hobby for each other. Don't to be forced someone or something that they don't want do that. You must know how great and important the book *Nursing Informatics for the Advanced Practice Nurse: Patient Safety, Quality, Outcomes, and Interprofessionalism*. All type of book are you able to see on many solutions. You can look for the internet options or other social media.

**Bobbie Burke:**

Hey guys, do you really wants to finds a new book to see? May be the book with the subject *Nursing Informatics for the Advanced Practice Nurse: Patient Safety, Quality, Outcomes, and Interprofessionalism* suitable to you? The book was written by well known writer in this era. The actual book untitled *Nursing Informatics for the Advanced Practice Nurse: Patient Safety, Quality, Outcomes, and Interprofessionalism* is the main one of several books that everyone read now. This kind of book was inspired a number of people in the world. When you read this guide you will enter the new way of measuring that you ever know previous to. The author explained their thought in the simple way, so all of people can easily to understand the core of this publication. This book will give you a wide range of information about this world now. In order to see the represented of the world on this book.

**David Peacock:**

Reading a guide make you to get more knowledge from that. You can take knowledge and information from a book. Book is created or printed or highlighted from each source in which filled update of news. Within this modern era like at this point, many ways to get information are available for anyone. From media social including newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add

your understanding by that book. Isn't it time to spend your spare time to open your book? Or just in search of the Nursing Informatics for the Advanced Practice Nurse: Patient Safety, Quality, Outcomes, and Interprofessionalism when you necessary it?
