## Agent-Based Models (Quantitative Applications in the Social Sciences) Nigel Gilbert

Agent-based modeling (ABM) is a technique increasingly used in a broad range of social sciences. It involves building a computational model consisting of "agents," each of which represents an actor in the social world, and an "environment" in which the agents act. Agents are able to interact with each other and are programmed to be pro-active, autonomous and able to perceive their virtual world. The techniques of ABM are derived from artificial intelligence and computer science, but are now being developed independently in research centers throughout the world.

In **Agent-Based Models**, Nigel Gilbert reviews a range of examples of agent-based modeling, describes how to design and build your own models, and considers practical issues such as verification, validation, planning a modeling project, and how to structure a scholarly article reporting the results of agent-based modeling. It includes a glossary, an annotated list of resources, advice on which programming environment to use when creating agent-based models, and a worked, step-by-step example of the development of an ABM.

This latest volume in the SAGE Quantitative Applications in the Social Sciences series will have wide appeal in the social sciences, including the disciplines of sociology, economics, social psychology, geography, economic history, science studies, and environmental studies. It is appropriate for graduate students, researchers and academics in these fields, for both those wanting to keep up with new developments in their fields and those who are considering using ABM for their research.

### Key Features

- Aimed at readers who are new to ABM
- Offers a brief, but thorough, treatment of a cutting-edge technique
- Offers practical advice about how to design and create ABM
- Includes carefully chosen examples from different disciplines

### **From reader reviews:**

#### **Edward McClung:**

The book Agent-Based Models (Quantitative Applications in the Social Sciences) make one feel enjoy for your spare time. You can utilize to make your capable far more increase. Book can being your best friend when you getting stress or having big problem using your subject. If you can make studying a book Agent-Based Models (Quantitative Applications in the Social Sciences) for being your habit, you can get far more advantages, like add your personal capable, increase your knowledge about a number of or all subjects. It is possible to know everything if you like open and read a reserve Agent-Based Models (Quantitative Applications in the Social Sciences). Kinds of book are a lot of. It means that, science guide or encyclopedia or other folks. So , how do you think about this publication?

#### **Brittany Schafer:**

Do you certainly one of people who can't read satisfying if the sentence chained in the straightway, hold on guys this kind of aren't like that. This Agent-Based Models (Quantitative Applications in the Social Sciences) book is readable through you who hate those perfect word style. You will find the facts here are arrange for enjoyable reading through experience without leaving also decrease the knowledge that want to offer to you. The writer involving Agent-Based Models (Quantitative Applications in the Social Sciences) content conveys the thought easily to understand by many people. The printed and e-book are not different in the content but it just different such as it. So , do you still thinking Agent-Based Models (Quantitative Applications in the Social Sciences) is not loveable to be your top listing reading book?

#### **Clifford Caldwell:**

This Agent-Based Models (Quantitative Applications in the Social Sciences) is brand-new way for you who has attention to look for some information mainly because it relief your hunger details. Getting deeper you on it getting knowledge more you know otherwise you who still having bit of digest in reading this Agent-Based Models (Quantitative Applications in the Social Sciences) can be the light food for yourself because the information inside this book is easy to get through anyone. These books develop itself in the form that is reachable by anyone, that's why I mean in the e-book form. People who think that in e-book form make them feel tired even dizzy this book is the answer. So you cannot find any in reading a book especially this one. You can find actually looking for. It should be here for anyone. So , don't miss the idea! Just read this e-book variety for your better life and knowledge.

#### **Gaye Lewis:**

As a college student exactly feel bored to help reading. If their teacher requested them to go to the library in order to make summary for some publication, they are complained. Just minor students that has reading's internal or real their leisure activity. They just do what the trainer want, like asked to the library. They go to there but nothing reading critically. Any students feel that studying is not important, boring in addition to

can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this Agent-Based Models (Quantitative Applications in the Social Sciences) can make you sense more interested to read.
