Democratic Governance and Non-State Actors Anne-Marie Gardner

This book investigates whether international standards of good governance are applied to sub-state actors as well as to states. By examining the international response to self-determination claims, this project demonstrates that the international community does indeed hold sub-state groups accountable to such standards. Claimant groups that have internalized human rights and democratic norms are more likely to receive international support in the form of empowerment (promoting some form of self-governance). To illustrate the causal forces at work, the book presents three qualitative case studies - Kosovo, Nagorno-Karabakh, and the Western Sahara - to demonstrate that predictable changes in the international response occur as international perception of each claimant group's democratic record varies over time.
