## **Private Standards and Global Governance: Legal and Economic Perspectives (Leuven Global Governance series)** Axel Marx, Miet Maertens, Johan Swinnen, Jan Wouters

Private regulatory initiatives aim to govern supply chains across the globe according to a set of environmental, food safety and/or social standards. Until now, literature on the topic has been fragmented and divided by research fields. However, this unique and comprehensive book bridges these disciplinary and thematic research lines, bringing together an interdisciplinary group of leading scholars to identify key issues.

The expert contributors assess the state-of-the-art with regard to private regulation of food, natural resources and labour conditions. They begin with an introduction to, and discussion of, several leading existing private standards, and go on to assess private food standards and their legitimacy and effectiveness in the context of the global trade regime.

This truly multidisciplinary assessment of the scope and importance of private standards as a governance tool in a globalizing world will prove to be an enlightening read for a wide-ranging audience encompassing: academics, students, researchers, policymakers and analysts focusing on private forms of governance in several sectors including economics, law, politics, development, environment and agriculture.
