Pediatric Psychopharmacology For Primary Care Mark A Riddle M.D.

Confidently prescribe, monitor, and manage medications for childhood mental health disorders.

This game-changing resource from the American Academy of Pediatrics (AAP) arms you with a unique strategic approach - plus practice-tested, condition-specific treatment recommendations.

Free bonus digital tool! Get instant answers on specific conditions and medications from your desktop or mobile device!

Evidence-based conceptual framework

A clear, straightforward methodology - based on current research and clinical experience - defines discrete levels of psychotropic agents and spells out level-specific roles and responsibilities.

Group 1: Medications FDA-approved for youth for ADHD, anxiety, and depression - disorders for which pediatric primary care providers commonly initiate treatment and assume prescribing and monitoring responsibilities.

Administration and management information for each drug agent includes:

- Rationale for use
- Evidence supporting efficacy and safety
- Initial dosing and subsequent adjustments
- Measuring therapeutic success
- When to consult or refer

Group 2: Medications FDA-approved for youth, typically prescribed by specialists but often monitored in the primary care setting: antipsychotics, mood stabilizers, antidepressants, anxiolytics, and sleep aids. To support primary care clinician's collaborative role, usage rationales, efficacy data, and adverse effect profiles are specified for all of these agents.

Group 3: Medications not FDA-approved for youth that primary care clinicians will likely encounter. To support primary care clinician's collaborative role, efficacy data and adverse effect profiles are specified for these agents.

Proven, practice-focused guidance

Hands-on help spanning the therapeutic process:

- Assessing for common disorders
- Assessing for psychiatric comorbidities
- Identifying medication needs
- Informed consent
- Monitoring patient progress
- Managing side effects
- Managing multiple medications
- Stopping or changing medications

Marvin Ober:

As people who live in the particular modest era should be update about what going on or details even knowledge to make these individuals keep up with the era and that is always change and move forward. Some of you maybe may update themselves by reading through books. It is a good choice for yourself but the problems coming to a person is you don't know what one you should start with. This Pediatric Psychopharmacology For Primary Care is our recommendation to help you keep up with the world. Why, as this book serves what you want and wish in this era.

Irene Hoyt:

As a scholar exactly feel bored in order to reading. If their teacher expected them to go to the library or even make summary for some e-book, they are complained. Just minor students that has reading's heart and soul or real their pastime. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading very seriously. Any students feel that looking at is not important, boring along with can't see colorful pics on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Pediatric Psychopharmacology For Primary Care can make you feel more interested to read.
