Jeffrey Goodman

THE COMETS OF GOD shows that almost all of the large-scale catastrophes described or prophesied in the Bible can be explained as a consequence of cometary phenomena.

Dr. Goodman, an archeologist and geologist, has spent 20 years studying the Bible's stories and prophecies of catastrophe. His research reveals important scientific information hidden in the Bible. In a process that can be called "Biblical CSI," Goodman translated the original Hebrew words of the Bible according to their ancient usage, and then related them to recent archeological, geological, and astronomical discoveries. What Goodman discovered were dramatically different explanations for these events than the traditional translations have told. THE COMETS OF GOD documents significant scientific evidence that supports the Bible and helps to establish the reality of the ancient catastrophic events recorded in the Bible. Comets are the common denominator for the Flood, the destruction of the Tower of Babel, the destruction of Sodom and Gomorrah, some of the plagues of the Exodus, Joshua's great victory over the Amorites, Debra and Barak's victory over the Canaanites, and the "blast" that killed 185,000 Assyrians during the rule of King Hezekiah. THE COMETS OF GOD also gives scientific explanations for the catastrophic events the Bible prophesies to occur during the "end times." Many will be surprised to learn that the key to understanding passages such as the Seven Trumpets and Seven Vials of Revelation are comets, not nuclear bombs. Indeed, a large comet impact could cause the earth to rock in space, cause an earthquake that is over 14 on the Richter scale, unleash a series of tsunamis whose waves exceed a mile in height, and even cause the earth's crust to melt. Many prophetic passages suddenly make sense once we recognize that much of Revelation's mysterious imagery is describing the effects of different types of comet impact. How did the writers of the Bible come to 'know' so much about comets, the giant ice balls of space, before modern science?
