Component Database Systems

Component Database Systems is a collection of invited chapters by the researchers making the most influential contributions in the database industry's trend toward componentization

This book represents the sometimes-divergent, sometimes-convergent approaches taken by leading database vendors as they seek to establish commercially viable componentization strategies. Together, these contributions form the first book devoted entirely to the technical and architectural design of component-based database systems. In addition to detailing the current state of their research, the authors also take up many of the issues affecting the likely future directions of component databases.
