**Understanding Textiles (7th Edition)** Billie J. Collier, Martin Bide, Phyllis G. Tortora

This book helps readers *understand* how the components of textiles—fiber, yarn, fabric, dye, and finish—contribute to the performance of products for specific end uses. With a focus on the *why* behind the material, it encourages students to understand and predict textile properties and performance. This edition emphasizes the global environment and offers separate chapters in fiber properties; fabrics and structures; and nonwoven fabrics. Finishes are now separated into two chapters (physical/mechanical finishes and chemical finishes) and *Take a Closer look* sections bring an in-depth perspective to select chapter topics.
